

MUHAMMAD UMAIR

FULL STACK WEB DEVELOPER

ABOUT ME

My name is Muhammad Umair,
I'm a Full Stack Developer ❤️. I've spent countless nights coding, debugging and developing Frontend and Backend designs. I started my journey by enrolling into a web development course at Birdview Logic Business Hub and developed an ecommerce website using Frontend and Backend technologies. This experience taught me so much about the practical aspects of software development that you simply can't learn from a textbook.
